

Vectra[®] 3D for Dogs Easier than a Net.

←.....OR?.....→

In addition to year-round administration of disease drugs approved by the FDA, the **American Heartworm Society guidelines recommend:**

FOR PREVENTION:	<i>"Application of an EPA-registered mosquito repellent/ectoparasiticide has been shown to increase the overall efficacy of a heartworm prevention program."</i>
FOR TREATMENT:	<i>"In a dog diagnosed and verified as heartworm positive: Day 0 - Apply an EPA-registered canine topical product labeled to repel and kill mosquitoes. Day 30 - Apply an EPA-registered canine topical product to repel and kill mosquitoes."</i>

Repellency Matters

Get effective flea and tick prevention for a full month and align your clinic's heartworm prevention with the American Heartworm Society guidelines for prevention and treatment to include a topical product that repels mosquitoes.
