

DOUXO® CHLORHEXIDINE

FOR ANTISEPTIC CLEANSING AND BACTERIAL/FUNGAL SKIN INFECTIONS

Your veterinarian has recommended DOUXO® Chlorhexidine (pronounced "Duke-so") to help manage skin infections and support a healthy skin barrier. A strong barrier helps your pet's skin defend itself against things such as allergens, bacteria, and yeasts.

DOUXO® contains a unique molecule called Phytosphingosine (PS). It's a pro-ceramide to help rebuild the natural ceramides found in your pet's skin barrier that are critical in helping keep the skin healthy. DOUXO® Chlorhexidine helps manage skin infections that are responsive to chlorhexidine and climbazole.*

DOUXO® Chlorhexidine Products:

- Help soothe skin irritations
- Provide antiseptic cleansing of the skin
- Moisturize
- Help restore the skin barrier from the outside in

Available in
200 mL, 500 mL

DOUXO® Chlorhexidine Shampoo

Active ingredients:

Chlorhexidine gluconate 3%, Climbazole 0.5%,
Phytosphingosine salicyloyl 0.05%

- For antiseptic cleansing of the skin
- Antibacterial, antifungal and anti-inflammatory
- Soap-free
- Green tea fragrance

Available in 200 mL

DOUXO® Chlorhexidine Mousse

Active ingredients:

Chlorhexidine gluconate 3%, Climbazole 0.5%,
Phytosphingosine salicyloyl 0.05%

- Antibacterial, antifungal and anti-inflammatory
- Leave-on mousse for long-lasting antibacterial activity between baths¹
- Green tea fragrance

Available in 200 mL

DOUXO® Chlorhexidine Micro-emulsion Spray

Active ingredients:

Chlorhexidine gluconate 3%, Phytosphingosine salicyloyl 0.05%

- Antibacterial, antifungal and anti-inflammatory
- Micro-emulsion technology helps product travel over the surface of the skin
- Leave-on spray for long-lasting antibacterial activity between baths²

Net Contents:
30 pads

DOUXO® Chlorhexidine Pads

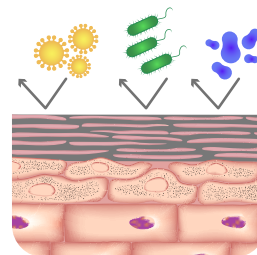

Active ingredients:

Chlorhexidine gluconate 3%, Climbazole 0.5%,
Phytosphingosine salicyloyl 0.05%

- Antibacterial, antifungal and anti-inflammatory
- Local antiseptic skin cleansing
- Green tea fragrance

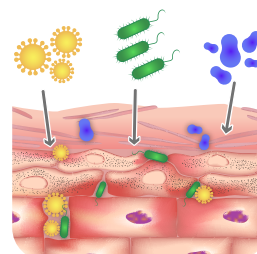

A HEALTHY SKIN BARRIER

- Retains moisture
- Maintains normal bacterial and yeast flora
- Prevents penetration of allergens
- Has a normal cell turnover rate

EFFECTS OF A DEFECTIVE SKIN BARRIER

- Dry skin
- Bacteria and yeast overgrowth
- Allergen penetration
- Abnormal cell turnover rate

*DOUXO® Chlorhexidine Micro-emulsion spray does not contain climbazole.

Your Recommended Application Method

Micro-emulsion Spray ☐ Days ☐ Weeks ☐ Months
Mousse ☐ Days ☐ Weeks ☐ Months
Pads ☐ Days ☐ Weeks ☐ Months

How To Apply Your Recommended Product

Shampoo (Soap-free, low-lather shampoo. Do not overapply.)

Before bathing, gently remove all tangles and mats. Use cool water to wet your pet's fur from the neck down avoiding the eyes and inside of ears. Place a small amount of shampoo on your hands and gently massage onto areas of the body with skin abnormalities. Next, massage shampoo on the remainder of the body, sparing the head and ears. Ensure shampoo reaches the skin. Leave the shampoo on for 10 minutes. Rinse with cool water until the water runs clear.

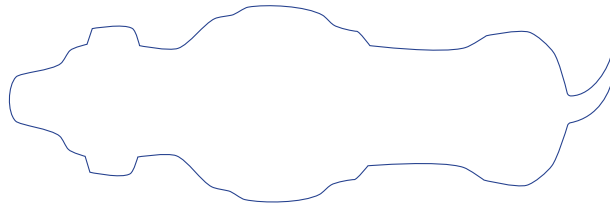

Micro-emulsion Spray (Shake well before use.)

Brush the hair coat against the natural fur line, then spray the product by holding the pump approximately 12 inches from the pet's body. The product will disperse naturally. Do not overapply.

Dosage: 1 spray per 10 lbs of body weight. Dosage may be doubled for long-haired breeds.

Note: Approximately 400 sprays per bottle

Veterinarian: Draw arrows to indicate where to apply product.

Mousse (Shake well before use. Brush the hair coat then apply on dry hair.)

For localized application: Dispense 1 to 2 pumps in the hand and then apply on the targeted area, massage into the skin until fully penetrated. Do not rinse. Let air dry. Once dry, brush the hair coat again.

For whole body application: Dispense 1 or 2 pumps in the hand and then apply on the skin and hair. Massage into the skin until fully penetrated. Repeat as many times as necessary to cover the whole body, avoiding areas around the eyes and mouth. Do not rinse. Let air dry. Once dry, brush the hair coat again.

Dosage: Under 11 lbs: 1 pump per 2 lbs • 11-88 lbs: 1 pump per 4 lbs • Over 88 lbs: 1 pump per 6 lbs
Dosage can be doubled for long-haired breeds.

Note: Approximately 150 pumps per bottle

Pads

Wipe folds/affected areas once a day for 7-14 days or as directed by your veterinarian. Use within three months of opening.
