

# DOUXO<sup>®</sup>

## Chlorhexidine 3% PS Pads

### for dogs and cats

DOUXO<sup>®</sup> Chlorhexidine Pads are thick, soft, 100% cotton pads for treatment of infected areas or areas that need antiseptic cleansing.

DOUXO<sup>®</sup> Chlorhexidine pads are thick cotton pads soaked in an emulsion that provides deep cleansing, with ingredients to fight bacterial and fungal infections responsive to chlorhexidine. Micellar technology helps lift away dirt and debris without stripping the skin.

This moisturizing, non-steroidal, non-stinging solution, contains phytosphingosine, a pro-ceramide to help rebuild the natural ceramides in the skin that are critical in helping keep the skin healthy.

#### USAGE:

Use once a day for 7 – 14 days or as directed by your veterinarian. Ideal for small or difficult to reach areas.

#### KEY INGREDIENTS:

**Chlorhexidine Gluconate 3%:** an antibacterial and antifungal agent.

**Climbazole 0.5%:** an antifungal agent.

**Phytosphingosine salicyloyl 0.05%:** phytosphingosine (PS) is found naturally in the stratum corneum and some skin ceramides. PS applied topically can help restore the skin barrier. It also has anti-inflammatory properties to help soothe skin irritations.

#### SITUATIONS THAT MAY BENEFIT FROM DOUXO<sup>®</sup> CHLORHEXIDINE PADS:

Pyoderma	Tear Stains
Bacterial Infections	Yeast Infections
Saliva Stains	Malassezia Overgrowth
Facial Folds	Atopic Dermatitis
Skin Folds	Antiseptic Cleansing
Foot Pads	Ear Crusts
