

# How FELIWAY® and your Veterinarian are Working Together to Help Your Cat Have a Great Experience

We care just as much about your cat's emotional and mental well-being as we do about her/his physical health. Place the towel you were given over your cat's carrier. This towel is treated with **FELIWAY® CLASSIC** spray.

## Clinically Proven to Help Reduce the Stress of Travel and Veterinary Exams

**FELIWAY® CLASSIC** mimics the natural facial pheromone that cats use to mark their territory as safe.

Going to the vet can be very stressful for cats: the carrier, the car ride, the exam, scary clinic sounds - the list can go on and on. **FELIWAY® CLASSIC Spray** is clinically proven to help alleviate signs of stress and anxiety associated with travel and veterinary visits.<sup>1,2</sup>

Sometimes our modern life can conflict with cat's natural needs, resulting in stress. Signs of stress can be very subtle in cats. Have you noticed any changes in your cat(s) behaviors at home?

- Hiding more?
- Changes in appetite?
- Changes in litter box habits?
- For multi-cat households, have you noticed a change in how your cats are acting towards each other?

If you have ever noticed any of the above changes, your cat(s) may be experiencing stress and anxiety.

Just like **FELIWAY®** products can help decrease signs of stress at the veterinarian, they can help reduce signs of stress at home.\*

### **FELIWAY® CLASSIC**

Releases odorless feline facial pheromones to help control behaviors that occur due to change in a cat's environment.

- Helps reduce or eliminate stress-related behaviors like urine spraying and hiding

### **FELIWAY® MultiCat**

Releases odorless feline facial pheromones to help reduce tension and conflict between multiple cats in the home.

- Decreases the intensity and frequency of tension between cats

# How ADAPTIL® and your Veterinarian are Working Together to Help Your Dog Have a Great Experience

We care just as much about your dog's emotional and mental well-being as we do about her/his physical health. Tie the bandana you were given around your dog's neck. This bandana is treated with **ADAPTIL® Travel** spray.

## Clinically Proven to Help Reduce the Stress of Travel and Veterinary Exams

ADAPTIL® mimics natural canine pheromones to help dogs feel the same safety and security in their surroundings and with their owners, as they did with their mother. It provides dogs with calming reassurance and comfort in stressful situations, reducing signs of fear and anxiety.

ADAPTIL® has been clinically proven to decrease the signs of stress during veterinary exams.<sup>3</sup>

ADAPTIL® is a drug-free solution that helps dogs feel calmer during stressful situations like:

- Thunderstorms/fireworks
- Staying home alone
- Noisy holidays
- Car travel
- Adoption

Have you noticed any changes in your dog(s) behaviors at home?

- Seeming anxious when you leave the house?
- Fear of loud noises, such as thunderstorms or fireworks?
- Do you have a new puppy/dog that is crying at night?

If you have ever noticed any of the above changes, your dog(s) may be experiencing stress and anxiety.

**Just like ADAPTIL® products can help decrease signs of stress at the veterinarian, they can help your dog cope with stressful situations at home.\***

### ADAPTIL® Calm Home Diffuser

Helps dogs feel calm and relaxed at home, during stressful situations like staying home alone, loud noises, and car travel.

### ADAPTIL® Calm On-the-go Collar

Activated by body heat to provide constant reassurance for dogs indoors, outdoors or on-the-go.

### ADAPTIL® Travel

Sprayed directly in cars where dogs sit or sleep to help reduce behaviors that occur while traveling, such as crying, shaking and pacing.

### ADAPTIL® Junior

Provides comfort to newly adopted puppies and facilitates training.

Brings You Closer
