# Synovial Flex Advanced™ Soft Chews enable you to provide your patients with a highly palatable, multi-modal approach to support joint function and flexibility.

## ACTIVE INGREDIENTS:

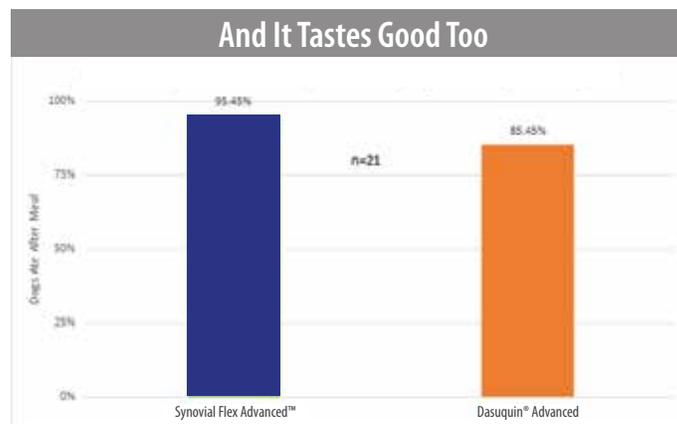

**Glucosamine HCl** helps maintain synovial fluid that lubricates joints. It may also stimulate the production of proteoglycans, which help maintain the health and resilience of joints and connective tissues.

**Chondroitin Sulfate** helps ensure adequate shock absorption and nourishment of the tissues that line the joint.

**Methylsulfonylmethane (MSM)** helps support cartilage and collagen building blocks.

**Eicosapentaenoic Acid (EPA) & Docosahexaenoic Acid (DHA) Omega-3 Fatty Acids** to help support a normal inflammatory response for occasional joint discomfort.

**Proprietary Blend†:** Manganese Sulfate, Zinc Sulfate, Citrus Bioflavonoids, Alpha Lipoic Acid, Grape Seed Extract, and Sodium Selenite. This blend provides critical co-factors for cartilage and collagen synthesis and helps fight free radicals generated by exercise.

Palatability assessment conducted by Ceva Animal Health, LLC. Graph demonstrates the number of dogs that ate the soft chew within 15 minutes after a meal.

60 ct soft chews available for dogs under 60 lbs.  
60 ct and 120 ct soft chews available for dogs over 60 lbs.
