The typical protocol is to shampoo once then use the mousse every 2-3 days for 3 weeks. Your veterinarian may customize your pet's topical regime.

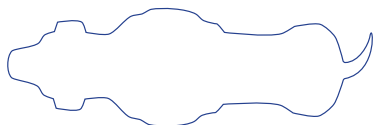

SHAMPOO

Before bathing, gently remove all tangles and mats.
Use cool water to wet your pet's fur from the neck down.
Place shampoo in your hands and gently massage it into the areas with skin abnormalities, then massage shampoo onto the rest of the body.
Leave on for 10 minutes, then rinse with cool water until the water runs clear. Repeat if necessary.
Dosage: Use 1 pump for every 4 pounds. Double the dosage for long and/or thick fur.

MICRO-EMULSION SPRAY

Shake well before use.
Brush the hair coat against the natural fur line.
Hold the pump approximately 12 inches away from the body and then spray the targeted area. The product will disperse naturally and migrate into the skin.
Dosage: 1 spray per 10 lbs of body weight. Dosage can be doubled for long-haired breeds.
Note: Approximately 400 sprays per bottle.

Veterinarian: Draw arrows to indicate where to apply product

MOUSSE

Shake well before use. Brush the hair coat and apply on dry hair.
Dosage: Under 13 lbs: 1 pump per 2 lbs
Over 13 lbs: 1 pump per 4 lbs
Dosage can be doubled for long and/or thick fur.

For localized application:

Dispense 1-2 pumps in your hand and then apply product to the targeted area, massaging into the skin until it fully penetrates. Do not rinse, let air dry. Once dry, brush the hair coat again.

For whole body application:

Dispense 1-2 pumps in your hand and then apply on the hair and skin, massaging into the skin until it fully penetrates. Repeat as many times as necessary to cover the whole body, avoiding the eyes and mouth. Do not rinse, let air dry. Once dry, brush the hair coat again.

Note: Approximately 200 pumps per bottle.

MICELLAR SOLUTION

Shake well before use.

For ear cleaning: Your veterinarian should indicate the correct application method for your pet.

- Moisten a cotton ball with solution. Place the moistened cotton ball in the entrance of the ear canal.

OR:

- Hold the ear flap upwards and fill the ear canal with the solution.

THEN:

Gently massage the base of the ear for 60 seconds. Remove the cotton ball (if used). Allow pet to shake its head.

Gently wipe away visible ear wax, debris, and excess solution with a dry cotton ball. Repeat procedure on other ear.

Do not use a cotton swab to clean the ear. Avoid contact of the applicator's tip with your pet's ear (or other surfaces) to help avoid contaminating the remaining solution in the bottle. Do not use in the case of a suspected ruptured eardrum.

To clean other areas of the skin: Moisten a cotton ball or gauze with the solution and gently wipe the area to cleanse and remove visible debris. Repeat as often as necessary until clean.

CALM GEL

Shake well before use. Apply once a day or as directed by your veterinarian.

Hold the pump approximately 8 inches from the skin.
2-3 sprays treats an area about 4 inches in diameter.

Note: Approximately 250 sprays per bottle.

PADS

Wipe folds/affected areas once a day for 7-14 days or as directed by your veterinarian.

Note: Use within 3 months of opening.
