

Vectra 
for Cats & Kittens

**Protection for the way
your cat lives.**

From couch Calicos

to reclusive Ragdolls

**All cats and kittens, even indoor cats and
kittens, need tailored protection against fleas.**

**Vectra® for Cats & Kittens provides 30-day
protection against fleas, flea eggs, and larvae
- no bite required.**

Ask your veterinarian about Vectra® for Cats & Kittens.

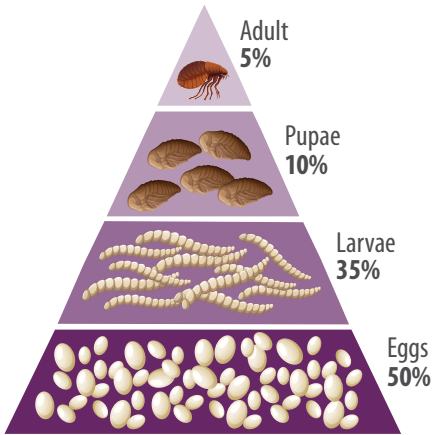

Vectra® for Cats & Kittens weighing at least 2 lbs. and 8 weeks of age or older.

EFFECTIVE:

- Kills fleas in 6 hours on cats
- Kills fleas through contact and breaks the flea lifecycle
- No bite required - does not give infected parasites a chance to spread disease and illness

EASY TO APPLY: Long, rounded tip makes it comfortable for your cat and easy for you to get through the fur, applying directly to the skin.

EASY TO COMPLY: Vectra® for Cats & Kittens monthly application makes it easy to pair with a monthly heartworm preventive and dewormer.

The Flea Pyramid

Flea infestations can be a real pain – and the adult fleas you see are only 5% of the total infestation. The remainder of the infestation is eggs, larvae and pupae in your home environment. A single dose of Vectra® for Cats & Kittens effectively stops flea infestations and prevents re-infestations on your cat for one month. If you have a flea infestation, it can take up to 3 or 4 months of use to completely get rid of all of the immature life stages in your home.
